## Notes

---

- <sup>1</sup> Returns in this statement are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax rate may be lower.
- <sup>2</sup> Fund fees are fees charged as a percentage of a member's interest in the fund (i.e. as a percentage of their KiwiSaver account balance).
- <sup>3</sup> From 1 May 2014, the annual management fee has increased to 0.95% per annum.
- <sup>4</sup> Other fees and costs comprise:
  - (a) operating costs directly incurred by the fund; and
  - (b) annual management fees, performance-based fees and operating costs incurred by underlying funds the fund invests into.

Estimates were used when deriving annual management fees, performance-based fees and operating costs incurred by certain underlying funds that the fund invests into. A list of underlying funds where estimates were used follows.

Fund	Information and assumptions used to make estimates
Nordea 1 – US Total Return Bond Fund	Fee and operating cost information obtained from the administrator of the Nordea 1 – US Total Return Bond Fund was for the year to 31 December 2013.

- <sup>5</sup> Membership fees are the fixed dollar charges for membership in the KiwiSaver scheme. For members who invested in more than one fund in the NZ Funds KiwiSaver Scheme, \$42.62 was the maximum membership fees charged over the year to 31 March 2014. From 1 April 2014, membership fees have reduced to \$36.00 per annum.
- <sup>6</sup> NZ Funds uses derivatives as part of its active investment management approach. The use of derivatives can result in the fund being leveraged. Leverage occurs when the total economic exposure exceeds 100%. Where leverage exists the actual investment mix pie chart and the target investment mix table have been scaled to total 100%. Removing the effect of scaling, the total economic exposure of the fund as shown in the actual investment mix and the target investment mix, would be 104.65% and 105.00% respectively. See the latest NZ Funds KiwiSaver Portfolio Insights for more details on the economic exposure for this fund; available at [www.nzfunds.co.nz/kiwisaver\\_portfolio\\_information.html](http://www.nzfunds.co.nz/kiwisaver_portfolio_information.html).

NZ Funds uses an active investment management approach and as a result the target investment mix may change from time to time.

- <sup>7</sup> The top 10 investments have been compiled using a balance sheet approach. This differs from the approach used in compiling the actual and target investment mixes, which include the impact of derivatives.
