Notes

- ¹ Returns in this statement are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax rate may be lower.
- ² Fund fees are fees charged as a percentage of a member's interest in the fund (i.e. as a percentage of their KiwiSaver account balance).
- 3 On 1 May 2014 the management fee increased from 1.10% to 1.30% per annum.
- ⁴ Other fees and costs comprise:
 - (a) operating costs directly incurred by the fund; and
 - (b) annual management fees, performance-based fees and operating costs incurred by underlying funds the fund invests into.

Included within other fees and costs are performance-based fees, which totalled 2.95% per annum, that were charged by the underlying external funds the fund invests into. Performance-based fees are subject to market movements and external manager performance. The amount of these performance-based fees for the current period may materially differ from the performance-based fees being disclosed for the year to 31 March 2015.

Estimates were used when deriving annual management fees, performance-based fees and operating costs incurred by certain underlying funds that the fund invests into. A list of underlying funds where estimates were used follows.

Fund	Information and assumptions used to make estimates	
Magellan Global Fund	The performance-based fee is confirmed biannually each June and December by the administrator of the Magellan Global Fund. Outside of these dates, an estimate of this fee is calculated using the same performance criteria as that used by the administrator of the Magellan Global Fund.	
OEI Mac	Fee and operating cost information obtained from the administrator of OEI Mac was for the year to 31 December 2014. The performance-based fee is estimated using the same performance criteria as that used by the administrator of OEI Mac.	
Suvretta Offshore Fund	The performance-based fee is estimated using the same performance criteria as that used by the administrator of the Suvretta Offshore Fund.	

- ⁵ Membership fees are the fixed dollar charges for membership in the KiwiSaver scheme. For members who invested in more than one fund in the NZ Funds KiwiSaver Scheme, \$36.00 was the maximum membership fee charged over the year to 31 March 2015.
- NZ Funds uses derivatives as part of its active investment management approach. The use of derivatives can result in the fund being leveraged. Leverage occurs when the total economic exposure exceeds 100%. Where leverage exists the actual investment mix pie chart and the target investment mix table have been scaled to total 100%. Removing the effect of scaling, the total economic exposure of the fund as shown in the actual investment mix and the target investment mix, would be 148.77% and 147.00% respectively. See the latest NZ Funds KiwiSaver Strategy Profiles for more details on the economic exposure for this fund; available at www.nzfunds.co.nz/kiwisaver_portfolio_information.html.

NZ Funds uses an active investment management approach and as a result the target investment mix may change from time to time.

⁷ The top 10 investments have been compiled using a balance sheet approach. This differs from the approach used in compiling the actual and target investment mixes, which include the impact of derivatives.
