

What fees are investors charged?

Investors in the Property Inflation Portfolio are charged fund charges. In the year to 31 March 2017 these were:

	% of net asset value
Total fund charges	2.85%
Which are made up of:	
Total management and administration charges	2.85%
Including:	
Manager's basic fee	1.75%
Other management and administration charges	1.10%
Total performance-based fees	n/a

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the NZ Funds Managed Portfolio Service for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Liam had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Liam received a return after fund charges were deducted of \$610 (that's 6.10% of his initial \$10,000). Liam did not pay any other charges. This gives Liam a total return after tax of \$610 for the year.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Actual investment mix

Cash and cash equivalents	8.51%
New Zealand fixed interest	2.57%

You can also obtain this information, the PDS for the NZ Funds Managed Portfolio Service, and some additional information from the offer register at www.companiesoffice.govt.nz/disclose/.

Notes

1. The bar graph shows fund returns after the deduction of fees and tax; however, the market index returns are shown before any fees or tax are deducted.
2. The fund is able to invest in a wide range of assets and does not have a target investment mix. For the purposes of this update, the target investment mix has been compiled using the actual investment mix. NZ Funds is an active investment manager and as a result the actual investment mix and target investment mix will change in the future and changes may be material.
3. The top 10 investments have been compiled using a balance sheet approach. This differs from the approach used in compiling the actual and target investment mixes, which include the impact of derivatives.
