

## What fees are investors charged?

Investors in the Global Equity Growth Portfolio are charged fund charges. In the year to 31 March 2017 these were:

	% of net asset value
<b>Total fund charges</b>	4.16%
Which are made up of:	
<b>Total management and administration charges</b>	3.63%
Including:	
Manager's basic fee	1.75%
Other management and administration charges*	1.88%
	(estimate) <sup>2</sup>
<b>Total performance-based fees</b>	0.53%

\*Note: Included within "Other management and administration charges" are performance-based fees charged by external managers of underlying funds that the fund invested into which totalled 0.64%. "Total performance-based fees" is the performance fee charged by NZ Funds based on the performance of the fund. Performance-based fees are subject to market movements and manager performance and the amount of these fees for any given period may materially differ from those disclosed for the year to 31 March 2017.

See the PDS for more information about the basis on which performance-based fees are charged.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the NZ Funds Managed Portfolio Service for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

## Example of how this applies to an investor

Liam had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Liam received a return after fund charges were deducted of \$1,232 (that's 12.32% of his initial \$10,000). Liam did not pay any other charges. This gives Liam a total return after tax of \$1,232 for the year.

## Notes

1. The bar graph shows fund returns after the deduction of fees and tax; however, the market index returns are shown before any fees or tax are deducted.
2. Other management and administration charges comprise:
  - (a) operating costs directly incurred by the fund; and
  - (b) annual management fees, performance-based fees and operating costs incurred by underlying funds the fund invests into.

Estimates were used when deriving annual management fees, performance-based fees and operating costs incurred by the following underlying funds the fund invested into.

<b>Fund</b>	<b>Information and assumptions used to make estimates</b>
True Partner Fund	The fee and operating cost amount obtained from the manager of the True Partner Fund was for the year to 31 December 2016. Performance fee amounts are estimated using the same criteria used by the manager of the True Partner Fund.
Kuvari Focus Fund	Fee and operating cost amounts are estimated using fee targets provided by the manager of the Kuvari Focus Fund.
Suvretta Offshore Fund	The fee and operating cost amount obtained from the audited financial statements of the Suvretta Offshore Fund was for the year to 31 December 2016. Performance fee amounts are estimated using the same criteria used by the manager of the Suvretta Offshore Fund.

3. NZ Funds uses derivatives as part of its active investment management approach. The use of derivatives can result in the total economic exposure of the fund exceeding 100% which means the fund is leveraged. Where economic exposure exceeds 100%, the actual investment mix pie graph and the target investment mix table have been scaled to 100%. Without scaling, the total economic exposure of the fund, as shown in the actual investment mix and the target investment mix, would be 198.25% and 198.00% respectively. For more information on economic exposure, see the NZ Funds Managed Portfolio Service 'Other Material Information' document on the offer register at [www.companiesoffice.govt.nz/disclose](http://www.companiesoffice.govt.nz/disclose/).
4. The fund is able to invest in a wide range of assets and does not have a target investment mix. For the purposes of this update, the target investment mix has been compiled using the actual investment mix. NZ Funds is an active investment manager and as a result the actual investment mix and target investment mix will change in the future and changes may be material.
5. The top 10 investments have been compiled using a balance sheet approach. This differs from the approach used in compiling the actual and target investment mixes, which include the impact of derivatives.
