

NZ Funds Managed Superannuation Service Income Strategy

This fund update was first made publicly available on 3 May 2017

What is the purpose of this update?

This document gives you information about the Income Strategy including what fees were charged. The document will help you to compare the fund with other funds. New Zealand Funds Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The objective of the Income Strategy is to provide exposure to income-orientated assets using an active investment management approach. The anticipated primary investments of the fund are international fixed interest.

Total value of the fund	\$32,837
Number of investors in the fund	8
The date the fund started	25 January 2017

What are the risks of investing?

Risk indicator for the Income Strategy: ¹

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.nzfunds.co.nz/AdviceSolutions/RiskProfile/

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

The risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 31 March 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	not applicable
Annual return (after deductions for charges but before tax)	not applicable
Market index annual return (reflects no deduction for charges and tax)	3.59%

The market index annual return is based on a composite index calculated using the market indices and weightings set out in the Statement of Investment Policy and Objectives (SIPO). Additional information about the market index is available on the offer register at www.companiesoffice.govt.nz/disclose.

What fees are investors charged?

Investors in the Income Strategy are charged fund charges. Based on the PDS dated 3 May 2017, these are estimated to be:

	% of net asset value
Total fund charges (estimated) ²	1.20%
Which are made up of:	
Total management and administration charges (estimated)	1.20%
Including:	
Manager's basic fee	1.10%
Other management and administration charges	0.10%
Total performance-based fees	n/a

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the NZ Funds Managed Superannuation Service 'Other Material Information' document on the offer register at www.companiesoffice.govt.nz/disclose for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Liam had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Liam received a return after fund charges were deducted of \$359 (that's 3.59%³ of his initial \$10,000). Liam did not pay any other charges. This gives Liam a total return after tax of \$359 for the year.

Notes

- 1 As the fund started on 25 January 2017, actual returns for the last five years are not available. To calculate the risk indicator, a combination of actual returns and market index returns have been used. Market index returns were used for the period prior to 25 January 2017. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
- 2 As the fund started on 25 January 2017, historical fee information for the most recent scheme year is not available. The total fund charges shown are based on the fee information in the PDS dated 3 May 2017. It includes our best estimate of the fees and costs that will be charged to the fund including fees and costs payable in respect of the underlying funds in which the fund invests (including performance fees that may be charged by underlying external managers). For more information on the basis of estimates, see the PDS and the NZ Funds Managed Superannuation Service 'Other Material Information' document on the offer register at www.companiesoffice.govt.nz/disclose.
- 3 As the fund started on 25 January 2017, this calculation is based on the market index return for the past year.
- 4 NZ Funds uses derivatives as part of its active investment management approach. The use of derivatives can result in the total economic exposure of the fund exceeding 100% which means the fund is leveraged. Where economic exposure exceeds 100%, the actual investment mix pie graph and the target investment mix table have been scaled to 100%. Without scaling, the total economic exposure of the fund, as shown in the actual investment mix pie graph and the target investment mix table, would be 104.47% and 105.00% respectively. For more information on economic exposure, see the NZ Funds Managed Superannuation Service 'Other Material Information' document on the offer register at www.companiesoffice.govt.nz/disclose.
- 5 The fund is able to invest in a wide range of assets and does not have a target investment mix. For the purposes of this update, the target investment mix has been compiled using the actual investment mix. NZ Funds is an active investment manager and as a result the actual investment mix and target investment mix will change in the future and changes may be material.
- 6 The top 10 investments have been compiled using a balance sheet approach. This differs from the approach used in compiling the actual and target investment mixes, which include the impact of derivatives.
