

Example of how this applies to an investor

Liam had \$10,000 in the investment option at the start of the year and did not make any further contributions. At the end of the year, Liam received a return after fund charges were deducted of \$400 (that's 4.00%⁴ of his initial \$10,000). Liam also paid \$36 in other charges. This gives Liam a total return after tax of \$364 for the year.

What does the investment option invest in?

This shows the types of assets that the investment option invests in.

Actual investment mix⁵

Cash and cash equivalents	5.32%
New Zealand fixed interest	8.24%
International fixed interest	9.67%
Australasian equities	19.49%

10	Uber Technologies Inc	2.02%	International equities	United States of America	

The top 10 investments make up 54.87% of the fund.⁷

NZ Funds actively manages the foreign currency exposure of the investment option. Where the investment option holds assets denominated in a foreign currency, NZ Funds has the choice of whether to hedge back to the NZ dollar or retain a foreign currency exposure. The investment option may also take active foreign currency positions by holding non-NZD cash and/or foreign currency derivatives. As at 30 June 2020, the investment option's foreign currency exposure was 21.59%.

Key personnel

This shows the directors and employees who have the most impact on the investment decisions of the investment option.

Name	Current position	Time in current position	Previous or other position	Time in previous or other position

Further information

You can also obtain this information, the PDS for NZ Funds WealthBuilder, and some additional information from the offer register at www.companiesoffice.govt.nz/disclose/.

Notes

- 1 To calculate the risk indicator, a combination of actual returns and market index returns have been used as the investment option does not have a full five year return history. Market index returns were used for the period prior to 27 February 2020. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the investment option.
- 2 Historical fee information for the most recent scheme year is not available. The total fund charges shown are based on fee information in the PDS dated 9 June 2020. It includes our best estimate of the fees and costs that will be charged including fees and costs payable in respect of the underlying funds in which the investment option invests (including performance fees). For more information on the basis of estimates, see the PDS and the NZ Funds WealthBuilder 'Other Material Information' document on the offer register at www.companiesoffice.govt.nz/disclose.
- 3 For investors aged 18 or over, NZ Funds charges an administration fee of \$3 per month.
- 4 This calculation is based on the market index return for the past year as there is no past year actual return for the investment option.
- 5 NZ Funds uses derivatives as part of its active management approach. The use of derivatives can result in the total economic exposure of the investment option exceeding 100% which means the investment option is leveraged. Where economic exposure exceeds 100%, the actual investment mix pie graph has been scaled to 100%. Without scaling, the total economic exposure of the investment option, as shown in the actual investment mix would be 145.83%. For more information on economic exposure, see the Other Material Information document on the offer register at www.companiesoffice.govt.nz/disclose.
- 6 Targets indicate what is expected to apply over the course of an economic cycle and should be considered as general guidance only. NZ Funds is an active manager and may use investment strategies that differ materially from the targets.
- 7 The top 10 investments have been compiled using a balance sheet approach. This differs from the approach used in compiling the actual and target investment mixes, which include the impact of derivatives.
