

NZ Funds WealthBuilder LifeCycle - age 75

This fund update was first made publicly available on 28 July 2020

What is the purpose of this update?

This document tells you how the NZ Funds WealthBuilder LifeCycle - age 75 has performed and what fees were charged. The document will help you to compare the investment option with other investment options. New Zealand Funds Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this investment option

The objective of LifeCycle is to allocate your investment across the NZ Funds WealthBuilder Income, Inflation and Growth Strategies based on your age to ensure your investment is allocated in a manner consistent with your investment timeframe. At age 75, your investment will be allocated as follows: 35% to the Income Strategy; 34% to the Inflation Strategy; and 31% to the Growth Strategy.

Total value of the investment option	\$0
--------------------------------------	-----

The date the investment option started	18 May 2020
--	-------------

What are the risks of investing?

Risk indicator for the NZ Funds WealthBuilder LifeCycle - age 75¹:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the investment option's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.nzfunds.co.nz/AdviceSolutions/RiskProfile/

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

The risk indicator is not a guarantee of a investment option's future performance. The risk indicator is based on the returns data for the five years to 30 June 2020¹. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this investment option.

How has the investment option performed?

	Past year
Annual return (after deductions for charges and tax)	not applicable
Annual return (after deductions for charges but before tax)	not applicable
Market index annual return (reflects no deduction for charges and tax)	4.32%

The market index annual return is based on a composite index calculated using the market indices and weightings set out in the Statement of Investment Policy and Objectives (SIPO). Additional information about the market index is available on the offer register at www.companiesoffice.govt.nz/disclose/.

What fees are investors charged?

Investors in the NZ Funds WealthBuilder LifeCycle - age 75 are charged fund charges. Based on the PDS dated 9 June 2020, these are estimated to be:

	% of net asset value
Total fund charges (estimated)²	1.38%
Which are made up of:	
Total management and administration charges (estimated)	1.35%
Including:	
Manager's basic fee	1.12%
Other management and administration charges	0.23%
Total performance-based fees (estimated)	0.03%
Other charges	\$ amount per investor
Administration fee ³	\$36

See the PDS for NZ Funds WealthBuilder for more information about the basis on which performance fees are charged.

Investors are not currently charged individual action fees (for example, withdrawing from or switching funds). See the PDS for more information about fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Liam had \$10,000 in the investment option at the start of the year and did not make any further contributions. At the end of the year, Liam received a return after fund charges were deducted of \$432 (that's 4.32%⁴ of his initial \$10,000). Liam also paid \$36 in other charges. This gives Liam a total return after tax of \$396 for the year.

What does the investment option invest in?

This shows the types of assets that the investment option invests in.

Actual investment mix⁵

Cash and cash equivalents	7.00%
New Zealand fixed interest	10.64%

10	Chorus	1.85%	Australasian equities	New Zealand	

The top 10 investments make up 51.92% of the fund.⁷

NZ Funds actively manages the foreign currency exposure of the investment option. Where the investment option holds assets denominated in a foreign currency, NZ Funds has the choice of whether to hedge back to the NZ dollar or retain a foreign currency exposure. The investment option may also take active foreign currency positions by holding non-NZD cash and/or foreign currency derivatives. As at 30 June 2020, the investment option's foreign currency exposure was 18.39%.

Key personnel

This shows the directors and employees who have the most impact on the investment decisions of the investment option.

Further information

You can also obtain this information, the PDS for NZ Funds WealthBuilder, and some additional information from the offer register at www.companiesoffice.govt.nz/disclose/.

Notes

- 1 To calculate the risk indicator, a combination of actual returns and market index returns have been used as the investment option does not have a full five year return history. Market index returns were used for the period prior to 27 February 2020. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the investment option.
- 2 Historical fee information for the most recent scheme year is not available. The total fund charges shown are based on fee information in the PDS dated 9 June 2020. It includes our best estimate of the fees and costs that will be charged including fees and costs payable in respect of the underlying funds in which the investment option invests (including performance fees). For more information on the basis of estimates, see the PDS and the NZ Funds WealthBuilder 'Other Material Information' document on the offer register at www.companiesoffice.govt.nz/disclose.
- 3 For investors aged 18 or over, NZ Funds charges an administration fee of \$3 per month.
- 4 This calculation is based on the market index return for the past year as there is no past year actual return for the investment option.
- 5 NZ Funds uses derivatives as part of its active management approach. The use of derivatives can result in the total economic exposure of the investment option exceeding 100% which means the investment option is leveraged. Where economic exposure exceeds 100%, the actual investment mix pie graph has been scaled to 100%. Without scaling, the total economic exposure of the investment option, as shown in the actual investment mix would be 139.42%. For more information on economic exposure, see the Other Material Information document on the offer register at www.companiesoffice.govt.nz/disclose.
- 6 Targets indicate what is expected to apply over the course of an economic cycle and should be considered as general guidance only. NZ Funds is an active manager and may use investment strategies that differ materially from the targets.
- 7 The top 10 investments have been compiled using a balance sheet approach. This differs from the approach used in compiling the actual and target investment mixes, which include the impact of derivatives.
